INVIXIUM IMPLEMENTATION SERVICES

Secure. Customer-centric. Convenient Implementation Services.

Smooth and safe deployment of Invixium Biometric Systems by our professional and expert technicians

BENEFITS

- Transition seamlessly to our solution

- Simplified and streamlined deployment process

- Overcome any challenges through remote or in-person training

- Execute a data migration project effectively

- Take advantage of our expertise for best practice policies and configuration

Why do you need Implementation services?

Do you need a secure, professional, and holistic implementation of biometric access control and workforce management solutions? Well, look no further.

At Invixium, we take pride in offering end-to-end solutions to our consumers by providing them with an array of top-notch support services that ensure the secure working of their customized access control and workforce management solutions. Our team has the ability to execute every task professionally and we guarantee the smooth and safe installation of our biometric system.

Enhanced Solutions

You're switching from cards to biometrics, migrating from one biometric system to Invixium, or installing your first high-level access control or time-tracking solution

Assist with Enrollment

You have a large workforce and need the enrollment process to go quickly and smoothly

Knowledge Transfer

You have specific staff members on-site that need to become resident experts on your Invixium solution to support your users

What do we bring to the table?

Implementation Services

Let technical services engineer remotely guide you on best practices and flow of installing the software, assist in enabling the various licenses depending on the modules purchased, set proper configurations, register the IXM biometric devices, and conclude by providing basic training to your administration personnel to ensure proper management of the system

Integrations

Basic integrations between IXM WEB and HRMS or similar systems to transfer employee data and transactions unit/bi-directionally. Such an integration keeps the data between systems synchronized and eliminates the need for manual data entry in two systems

Data Migration

Once you decide to migrate your employee and transaction data from your legacy systems to IXM WEB, Invixium's experienced technical services engineer will engage with you to scope the type and amount of data migration from a legacy system. On approval of the scope and cost, Invixium's professional engineering team will prepare a detailed plan, get your approval, and execute a data migration project effectively

On-site/Online training

To satisfy your needs and ensure your comfort with your system, we provide comprehensive on-site/online training services for IT, Human Resources, and administrative personnel

Installation services

If you don't have a system integration partner, our team of supervisors and technicians will ensure advanced security as they are equipped with the latest tools and an immense understanding of the specific needs of a project

Customizations

We understand that every business has its own set of security and stability needs and with our biometric solution customizations, we guarantee exhaustive functionality and robust control to our clients

What do you get?

High-value experience

With Invixium's highly capable team of experts, you receive the assurance that your biometric system is working in top condition

Well-trained staff

Personalized training that helps your administrators meet the needs of your staff

Assist with rollout

Confidence that your biometric system is installed and working correctly

Valuable Insights

Over 200 collective years of experience in biometrics and security system support from dozens of Invixium experts

Solutions deployment

The perfect biometric security system, designed and installed to fit your business's unique demands

Pricing

Implementation is sold in 4hr blocks and additional hours can be purchased in 4hr blocks only.

Integration is sold at a fixed cost on the basis of the scope of work. A PCD will be authored by Invixium. If there is any change in scope of work, additional charges will apply.

Data Migration is sold at a fixed rate per hour. Time and materials-based costing is also available.

There is no reduction in charges and no refund if the actual time utilized is less than originally scoped.
